AWAIS SABIR

AI Full Stack Software Engineer | Forward Deployed Engineer
Islamabad, Pakistan | awais0.sabir@gmail.com | +92 321 9844654 | linkedin.com/in/awais-sabir-dev

PROFESSIONAL SUMMARY

Senior Software Engineer with 3+ years building enterprise full-stack applications in .NET and Angular, now working as an AI Full Stack Engineer and Forward Deployed Engineer. Leading the SASO-Maneh migration (1,600+ requests, 2,000+ users) in Saudi Arabia and building Vantage Board, an AI productivity product. Delivered 100+ production REST APIs, automated 10+ business processes with Camunda 8 and RabbitMQ, and led an 8-engineer feature team.

EXPERIENCE

Senior Software Engineer (AI Full Stack & Forward Deployed Engineer) — AZM Development **July 2026 – Present**

- **SASO-Maneh:** Leading the migration workstream for this large-scale enterprise platform in Saudi Arabia, moving 1,600+ requests and 2,000+ users from the legacy Jeem system onto the new platform while keeping it stable, accurate and on schedule.
- **SASO-Maneh:** Working directly with clients as a Forward Deployed Engineer: gathering their queries, resolving issues, and making sure the platform fits how their teams actually work.
- **SASO-Maneh:** Turning client needs into clear business requirements and technical plans the team can build on.
- **SASO-Maneh:** Continuing to own backend design and delivery in .NET, building on the 100+ APIs and Camunda 8 / RabbitMQ workflows already in production.
- **Vantage Board:** Building an AI productivity product as an AI Full Stack Engineer (.NET, Angular): a unified dashboard that aggregates JIRA, Gmail and Outlook work into one actionable view, with AI classification and AI-drafted responses for user approval.
- **Vantage Board:** Developed the Gmail connector, bringing Gmail items into the dashboard so they can be classified and acted on alongside work from other tools.

Technologies: *.NET*, *Angular*, *TypeScript*, *Camunda 8*, *RabbitMQ*, *AI-driven development*

Software Engineer II — AZM Development **August 2025 – June 2026**

- Integrated Camunda 8 with the .NET backend on SASO-Maneh through the Zeebe .NET client, automating 10+ critical business processes end to end.
- Implemented RabbitMQ for message brokering and notification publishing, decoupling 5+ services and improving reliability.
- Led a team of 8 engineers on a time-boxed feature delivery, coordinating backend, frontend and QA to ship on schedule.
- Deployed onsite in Saudi Arabia as 1 of 3 engineers (full-stack plus BA/QA), resolving production issues and hot fixes directly with the client.
- Designed scalable .NET REST APIs, reorganized the backend for modularity and maintainability, and built Angular front-end components with product and frontend teams.

Software Engineer — AZM Development **February 2024 – July 2025**

- Designed and delivered 100+ backend REST APIs in .NET across a 20-engineer team, covering core business logic for the SASO enterprise SaaS platform.
- Owned database schema design and query optimization across 10+ modules, reducing average query execution time by about 40%.
- Built full-stack features spanning .NET services and Angular, contributing to 3+ major product releases.
- Developed Power BI dashboards and reports for 5+ services, enabling data-driven decisions for stakeholders.

Software Developer — National Aerospace Science and Technology Park (NASTP) **Dec 2023 – Jan 2024**

- Contributed to a defence-domain simulation system within a 22-person team using C++, C# and MFC, building MFC desktop UI components and technical documentation.
- Diagnosed and resolved performance and logic issues in an existing C++ codebase, improving the stability of critical simulation modules.

Java Backend Developer — Machine Intelligence 6 **Sept 2023 – Nov 2023**

- Delivered backend work on 2 concurrent client projects: a school management system for Army Public School and a retail POS system.
- Built RESTful APIs in Java Spring Boot, integrated Square UP payments, and built Java Swing tooling UIs.

Java Intern — Business Analytics (Pvt.) Ltd. **July 2022 – Aug 2022**

- Completed Sun Certified Java Programmer (SCP) coursework and built a CRUD demo application with Java Servlet within a 10+ person team.

EDUCATION

Bachelor of Science in Computer Science — FAST-NUCES, Islamabad **Aug 2019 – June 2023**

SKILLS

AI & Automation: AI-driven development, AI product development, third-party connector integration (Gmail), workflow automation, Camunda 8, Zeebe .NET Client

Backend: C#, .NET, .NET in Azure, REST APIs, RabbitMQ, Java, Spring Boot, Node.js, Python, C/C++

Frontend: Angular, TypeScript, JavaScript, React JS, HTML/CSS

Data & Tools: SQL, MongoDB, Power BI, Git
